

## **Spicy Devil® Ninebark**

*Physocarpus opulifolius 'ZLENATALIE'*

Height: 4 feet

Spread: 4 feet

Sunlight: ☐ ☒

Hardiness Zone: 3a

Other Names: Eastern Ninebark

### **Description:**

A spectacular, compact selection, with showy leaves that put on a colorful display, emerging orange-yellow and maturing to purple-red; beautiful white-pink blooms in spring; interesting peeling papery bark adds winter interest; extremely tough and durable

### **Ornamental Features**

Spicy Devil Ninebark features showy clusters of white flowers with shell pink overtones at the ends of the branches from late spring to early summer. It has attractive burgundy deciduous foliage which emerges orange in spring. The serrated lobed leaves are highly ornamental and turn outstanding shades of dark red and deep purple in the fall. It produces red capsules from early to mid fall. The peeling tan bark adds an interesting dimension to the landscape.

### **Landscape Attributes**

Spicy Devil Ninebark is a multi-stemmed deciduous shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. It has no significant negative characteristics.

Spicy Devil Ninebark is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Spicy Devil Ninebark will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
